

1 2		MINUTES OF SPECIAL MEETING WEDNESDAY, AUGUST 4, 2021
3 4	1.	CALL TO ORDER
5 6 7		Chair Watty called the special meeting of the Planning and Zoning Commission to order at 7:00 p.m. on Wednesday, August 4, 2021.
8 9	2.	ROLL CALL
10 11 12 13 14 15		Present: MacLeod, Momin, Pilch, Watty Absent: Donaldson Staff Present: Planning Manager Anne Hersch Associate Planner Christopher Tan
16	3.	EX PARTE COMMUNICATIONS
17 18 19 20		Commissioner Pilch disclosed discussions of the project at 540 San Pablo Avenue with individuals having no ownership or financial interest in the project.
21	4.	CONSENT CALENDAR
22 23		None
24 25 26	5.	ANNOUNCEMENTS/COMMUNICATIONS
27		None
28 29 30	6.	PUBLIC COMMENT
31		None
32 33 34 25	7.	DISCUSSION & POSSIBLE ACTION ON MATTERS RELATED TO THE FOLLOWING ITEMS:
35 36		None
37 38	8.	NEW BUSINESS
39 40 41 42 43 44		8-1. PA21-002 Proposed Mixed-Use Development at 540 San Pablo Avenue – A formal application has been submitted for a new mixed-use project with 207 units and 5,500 sq. ft. of ground-floor retail at 540 San Pablo Avenue. The subject site is 2.18 acres with existing commercial spaces approximately 37,700 sq. ft. in area. The applicant has submitted plans for Design Review and Density Bonus for two

1	mixed-use buildings that include a mix of studio, one-, two-, and three-bedroom
2	apartments and nine townhouses with three-bedroom units. Building A will have
3	121 units and will be 69' in height. Building B will have 77 units and will be 71' in
4	height. The townhouses will have nine units and will be 38' in height. The project
5	is proposed to have 181 off-street parking spaces. Two concessions are requested
6	for the open space requirement and Planned Unit Development (PUD)
7	requirement. This is a study session and no action will be taken.
8	
9	Recommendation: Staff recommends that the Planning & Zoning Commission
10	review the formal application and the revisions made by the applicant based on
11	comments received on the preliminary application and provide feedback. This is a
12	study session and no action will be taken.
13	OFOA: The unside this Octomorphism the Ensurement former OFOA assumed to Octomorphism
14	CEQA: The project is Categorically Exempt from CEQA pursuant to Section
15	15332, "In-Fill Development" of the CEQA Guidelines.
16	Diamping Manager Appa Herech presented the staff report dated August 4, 2024
17	Planning Manager Anne Hersch presented the staff report dated August 4, 2021.

37 PUBLIC HEARING OPENED

38

Yi-Shan Chen indicated the project does not comply with General Plan goals for
 pedestrian-oriented designs. The project will increase traffic on San Pablo and Clay. She
 expressed concerns about realistic landscape renderings and stormwater mitigation
 measures. The Commission should direct the applicant to reduce the heights of buildings
 and provide a shadow study, contextual view studies, an infrastructure feasibility study,
 and a traffic study.

Joe Matera believed the parking ratio of ½ space per residential unit is too low and suggested parking and traffic studies be conducted.

Buddy Williams supported the project and appreciated the inclusion of affordable housing units.

Dan Johnson supported the project and commended the applicant for proposing 207 residential units near schools and shopping. Electric building systems are available and can be included in the project.

Elaine Ngo expressed concern that building heights will reduce morning sunlight on neighboring residences.

Eric Biber did not believe the City could make findings required by the Housing Accountability Act to deny the project. The Commission should approve the project as expeditiously as possible.

Kara Vuicich supported the project and appreciated the applicant responding to Commissioners' comments with design changes. No one has presented data or facts to support concerns about parking impacts. Studies have found that people who live within a half mile of a BART station drive significantly less and require significantly less parking. Current vehicle ownership and commute modes are the best factual indicators of transportation patterns. Ideally, the parking ratio for the project could decrease more.

Lindsay Brothers concurred with Ms. Vuicich's comments regarding parking concerns. The project addresses Albany's commitment to fight the climate and housing crises. She urged the Commission to move the project forward and to consider data.

30 **Christopher Weinberger** agreed with requests for data. Currently, very few vehicles 31 utilize the Brighton driveway, but this project will significantly increase the number of 32 vehicles utilizing the driveway. Parking on Clay is already congested. Perhaps story 33 poles can be installed to demonstrate changes that the project will bring. The requested 34 increase in building heights does not make sense for the number of very-low-income units 35 provided in the project. He expressed concerns regarding mechanical parking.

- Chenglong Tsai supported the project because it is well designed and provides much
 needed housing. Traffic will not be affected as much as anticipated. Requiring all electric
 appliances is a great idea.
- 41 PUBLIC HEARING CLOSED
- 43 Commissioner MacLeod commended the applicant for redesigning the project to reflect 44 Commissioners' comments and making significant improvements to open space and

access to Adams Street. The location is ideal for this kind of development. Spaces along the street frontage for mechanical rooms and bicycle storage should be retail or commercial uses to activate the street. The bicycle rooms could be larger, and access to them could be more straightforward. The overall design, varied facades, rhythm of the various building sections, and massing are good. The townhouses are a nice addition to the project. The site could support more units. Parking could be reduced more to provide more open space. A larger seating area adjacent to the café could activate the street space even more.

Commissioner Momin indicated large and small changes have significantly improved the 10 overall design. The townhouses are a significant improvement over surface parking and 11 create a nice street frontage that is compatible with nearby residences. The current 12 locations of the easement and the garage entry to Building B are good ideas. The center 13 space is much more meaningful and has been designed efficiently and skillfully. The 14 pedestrian connections are a great amenity, but they are a bit too narrow. The provision 15 and distribution of open space are good. With more family units, the open space could 16 include a children's play area. The articulation and color palette of facades are attractive. 17 The San Pablo Avenue side of the sixth floor between the two bookends should be 18 19 stepped back 4-5 feet. The height of Building A along Adams Street should be reduced, and the building mass should be relocated to the San Pablo side of the building. Building 20 A's facade along Adams Street should have some residential character, especially the 21 lower two or three floors. The dog park may not be large enough to be useful. The 22 townhouses are well composed but need some variation in planes and patio heights. 23

- 24 25 Commissioner Pilch supported suggestions for a children's play area and variation in the townhouses. Blank building facades are a concern. Opening the garage walls to visibility 26 27 and air flow is preferable. The south, east, and west sides of Building A could be stepped 28 back. Parking spillover into neighborhoods could occur, and a parking permit program 29 could be beneficial. Parking for Buildings A and B is unbundled. The community would love some recognition of the Albany Bowl on the site, such as including the Albany Bowl 30 31 sign on the facade. Access to bicycle storage rooms should be easy. A cycle track on San Pablo Avenue could facilitate connections across town. The City requires charging 32 station infrastructure for all parking spaces and charging stations in 20% of all parking 33 Perhaps splashes of color could be incorporated in building facades. 34 spaces. Electrification of the project should not be a huge problem. 35
- 37 Chair Watty reiterated that density bonus projects are not required to comply with all aspects of local codes and General Plans. Market-rate units are needed to subsidize the 38 cost of affordable units. The townhouses, public open spaces, and bowling elements are 39 great. Incorporating the Albany Bowl sign into the project would be a special gift to the 40 community. Wider sidewalks and changes in architectural materials are appreciated and 41 a significant improvement. Eliminating the easement, if possible, would improve the 42 project and reduce the possibility of pedestrian conflicts. Building A's facade along San 43 Pablo appears monolithic and could benefit from some architectural differentiation. More 44

ground-floor spaces need to accommodate active uses. Planters in the second-level 1 terrace should be built-in. Building management should be responsible for maintaining 2 landscaping. Perhaps, the railings on townhouse balconies could be solid to minimize 3 privacy concerns, and EV charging stations could be installed in all parking spaces. 4 Future submissions should include details for window reveals. 5 6 Commissioner MacLeod noted electric building systems are available, cleaner, cost 7 effective, and energy efficient. The Brighton entrance is a concern and should be studied 8 for pedestrian safety. If the easement could be eliminated, the space could be a children's 9 play area or a multi-use area. Accessing the townhouse bike parking is difficult if a car is 10 parked in the garage. Replacing some of inactive uses on the storefront side of buildings 11 with active uses would be helpful and benefit the community. 12 13 Commissioner Pilch concurred with Commissioner MacLeod's comments. An all-electric 14 project would eliminate the cost of gas infrastructure. 15 16 NEXT MEETING - September 1, 2021, City Hall Council Chambers, 1000 San Pablo 9. 17 Avenue or virtual meeting pursuant to state and county guidance 18 19 Planning Manager Hersh announced the September 1 meeting will begin at 4 p.m. 20 21 10. ADJOURNMENT 22 23 The meeting was adjourned at 9:14 p.m. 24 25 26 27 Submitted by: Anne Hersch, Planning Manager 28 29 30 31 Jeff Bond, Community Development Director 32
